**DETAILED ACTION**

1. Applicant's election without traverse of claims 1-6 and 8-23 in the reply filed on 5/22/2008 is acknowledged.

***Election/Restrictions***

2. This application contains claims directed to the following patentably distinct species:
  3. Applicant must elect one from Species A and B:
  4. Species A, claim 3, drawn to heating before reducing.
  5. Species B, claim 4, drawn to heating after reducing.
  6. Applicant must elect one from Species C and D:
  7. Species C, claim 5, drawn to an element being a capture element.
  8. Species D, claim 6, drawn to an element being an occluder.
  9. Applicant must elect one from Species E, F, G, H and J:
  10. Species E, claim 8, drawn to electropolishing.
  11. Species F, claims 9 and 10, drawn to etching.
  12. Species G, claim 11, drawn to acid pickling.
  13. Species H, claim 12, drawn to mechanically grinding.
  14. Species J, claim 13, drawn to cutting and removing.
  15. Applicant must elect one from Species K, L and M:
  16. Species K, claim 14, drawn to filaments comprising nitinol wires.
  17. Species L, claims 15-17, drawn to filaments comprising drawn-filled tubing wires.

18. Species M, claim 18, drawn to filaments comprising a combination of nitinol and drawn-filled tubing wires.
19. Applicant must elect one from Species N and P:
20. Species N, claim 20, drawn to a gradual decreased profile.
21. Species P, claim 21, drawn to a stepped profile.
22. Applicant must elect one from Species Q and R:
23. Species Q, claim 22, drawn to a spiral pattern.
24. Species R, claim 23, drawn to a longitudinally striped pattern.
25. The species are independent or distinct because claims to the different species recite the mutually exclusive characteristics of such species. In addition, these species are not obvious variants of each other based on the current record.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 2 and 19 are generic.

There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

**Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined even though the requirement**

may be traversed (37 CFR 1.143) **and (ii) identification of the claims encompassing the elected species**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.

26. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher M. Koehler whose telephone number is (571)272-3560. The examiner can normally be reached on Mon.-Fri. 7:30A-4:00P.
